ABOUT ME

Hi, I'm a passionate **Trainee Full Stack Developer** have interest in **React, Node, Express,** and **PostgresSQL**. With a strong foundation in programming, my journey began with **Python**, which introduced me to core programming concepts that I now apply across various technologies. Currently, I am focusing on becoming a skilled **PERN Stack Developer**, combining my love for **JavaScript** with modern frameworks to create dynamic and user-friendly web applications. I hold a **Diploma in Information Technology** and certifications in **Python Programming** and **Digital Marketing Fundamentals**. My background includes expertise in creating responsive, visually appealing, and functional web applications using **React**, and **Vite**. In addition to technical skills, I bring strong **problem-solving abilities**, **time management**, and the capacity to work **both independently and as part of a team**. I take pride in being detail-oriented, punctual, and always eager to learn.

[11/12/2024 – Current]
Architecture Website
I create this for showcase of architectural website, but this is still ongoing project, I don't have enough info and resources to end this one, but I think this is going to be a good one, instead of just HTML and CSS I used React in this web app to give smooth routing for users. in the end I think this is gonna be so good and wonderful web app with server side for handle apis and db to store users data.
